

WHAT'S NEW IN PROPFUEL

Meet *Membership AI.*

Most membership teams aren't short on data — they're short on time, and short on a way to know what the data is telling them. Membership AI is PropFuel's intelligence layer. It reads every member response in context, surfaces what matters, and builds the audiences your team would build if they had the hours.

“I don't know what I don't know about our members.”

Membership AI surfaces patterns hiding in your data — without you having to ask the right question first.

“It's like doing the job of many.”

It builds the segments and reads the responses your team doesn't have time to. Quietly. In the background.

“We're losing nearly as many as we recruit.”

It flags churn risk and renewal intent before the window closes — so the right conversation happens at the right moment.

HOW MEMBERSHIP AI WORKS

01

It reads.

Every campaign response, every contact field, every CS call — in context.

02

It surfaces.

Patterns and signals worth acting on, ranked by confidence.

03

It builds.

Segments in plain language. The audiences your team would build, if they had the hours.

WHAT MEMBERSHIP AI ACTUALLY DOES

Two new features. Live today.

WHAT'S NEW · MEMBERSHIP AI

Signals *listen* for you.

Patterns already exist in your data. Membership AI finds them and surfaces what to track — at-risk members, disengaged cohorts, signs of intent — without adding work for your team.

WHAT'S NEW · MEMBERSHIP AI

Segments *build* themselves.

Type what you're looking for. Membership AI assembles the audience, asks clarifying questions, and lets you refine before you send.

YOU

members who joined in the last 90 days and attend our monthly events

→

1,247 contacts

- Renewal pace ahead of last year

HIGH

+18% vs. same week, May '25 — driven by spring campaign cohort.
- At-risk in the next 60 days

HIGH

214 members showing 3+ disengagement signals — flagged for outreach.
- Members keep asking the same thing

HIGH

"How do I update billing?" surfaced 47x in 14 days — knowledge gap.
- Onboarding stalled at week three

HIGH

62% of new joiners drop off after the first event invite — nudge opportunity.
- New members, first 90 days

1,247 contacts

Joined since Feb '26, opted into welcome track.
- Lapsed, but historically engaged

312 contacts

Renewed 3+ years before churning — strongest winback pool.
- Showing renewal intent

89 contacts

Opened the renewal email, clicked once, hasn't paid yet.
- Disengaged onboarding

445 contacts

Signed up but missed first three touchpoints — needs a different path.

"

You just gave us another staff member.
